DETAILED ACTION

This Office Action is in response to the Applicants' amendment filed July 21, 2006.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: claims 15-19, non-elected without traverse, have been canceled.

Allowable Subject Matter

Claims 1-6 and 8-14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose, make obvious, or otherwise suggest the structure of the applicant's together with the other limitations of the independent claims, such as:

In claim 1, "a source electrode and a drain electrode are formed on adjacent convex portions of the concavoconvex surface; and a semiconductor channel layer and a gate electrode are formed on a concave area between the convex portions; wherein

Art Unit: 2822

electric current between the source electrode and the drain electrode formed on the adjacent convex portions is controlled by voltage of the gate electrode formed on the concave, area located between the, source electrode and the drain electrode”;

In claim 4, “either one of a source electrode or a drain electrode is formed on a top surface of the convex portion of the concavoconvex surface, wherein the concavoconvex surface is formed of a curing resin; a semiconductor channel layer and a gate electrode are formed on a side surface area connecting to the top surface of the convex portion; and remaining one of the source electrode or the drain electrode is formed on a bottom surface of a concave portion connecting to the side surface area of the convex portion”; and

In claim 5, “a semiconductor channel layer, a gate insulating film and a gate electrode are laminated on the convex portion of the concavoconvex surface in this order; and a source electrode and a drain electrode are respectively formed on bottom surfaces of both sides of the convex portion”.

The dependent claims being further limiting and definite are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to thin film transistors:

Kim (5,693,549)

Miyazaki et al. (US 6,784,453 B2)

Vu et al. (5,377,031)

Yudasaka et al. (US 2003/0080337 A1).
